

I am part of the Indiana Telephone Privacy program. I like the program. Some of us work over night and do not appreciate people soliciting us when we are trying to sleep. Also I do not do business over the phone, in this day in age why would I give information to someone who calls me and claims to represent a company I have never done business with? There are other ways to get my business, they can send a letter, I will check them out and call them! Thank You, this works for our State. Respectfully, please, stop these companies from stepping on our right to peace and privacy. Thank You for your time!
